Vedlegg: Masto Lubricator Perseverance V.pdf

Hi Tor,

Feedback from Master "Perseverance V"

The Masto lubricator greatly assist in effective lubrication of wire ropes used for moorings, cranes, and accommodation ladder. We have found that it thoroughly removes old grease from one side and deeply penetrates the new grease to the core of wires on other side.

It is a safe/ clean & effective way of greasing wires and has proved to be a time saving tool compared to brush, rags. Costs of the seals are as below – and in my opinion reasonable for the way the wire lasts.

Below is the previous year expenditure:

- 1) 2015 : 3260 USD (including equipment + seals)
- 2) 2019 : 1980 USD (seal only) – DD preparation where new seals were procured with a mind that all wires will be changed.
- 3) 2020 : 345 USD (seal only)
- 4) 2024 : 650 USD (seal only)

Best Regards

Dolreich M. Fernandes
