av 30.03.1981

TO WHOM IT MAY CONCERN

The undersigend surveyor to Det norske Veritas was present when the "MASTO" wire lubricator was demonstrated on two wire dimentions:

22 mm galvanized wire (6x24)

16 mm Dyform wire (17x19), Non-Rotating

APPLIED GREASE: TEXCLAD 2

After being greased, the wires were split apart, and we can confirm that the grease had penetrated through the whole cross-section of the wires.

Yours faithfully
for DET NORSKE VERITAS

for K. Thunes
Surveyor in Charge
