MASTO HIGH PRESSURE WIRE LUBRICATOR

After having used the MASTO unit for approximately one year, we are very satisfied with the unit. It is a safe and clean way of greasing wires. It has proved to be a timesaving tool, compared to brush, cloth etc.

We are using the unit for greasing the tow-cables used on our side-scan sonar fishes. I am sure the life-span of the wires has extended.

This is the experience with the MASTO unit on the seismic vessels M/V "GEO SURVEYOR" and M/V "GEO SCANNER".

I will give my highest recommendation.
